

## Three Cases of Equine West Nile Virus detected at OADDL in 2016

The Oklahoma Animal Disease Diagnostic Laboratory (OADDL) offers in-house testing for West Nile Virus (WNV). The majority of Oklahoma equine WNV cases occur in the fall. Check OADDL's website for a complete list of testing capabilities at [www.cvhs.okstate.edu/oaddl](http://www.cvhs.okstate.edu/oaddl). Visit the [Equine Disease Communication Center](#) website for updates on all equine diseases.

### It's time to vaccinate/booster your horses for WNV!
