Good stallion handlers remain calm and do not overly punish or act punitively to punishment for what is actually normal behavior is likely to cause an increase in bad quickly lead to poor handling decisions. Overly timid behavior or excessive Selection and or training of stallion and mare handlers is extremely important. safe handling of the mare and stallion.

We can perform a variety of diagnostic and therapeutic procedures. Our radiology team is equipped to perform CT, MRI, and ultrasound. Our cardiology team can perform echocardiography, nuclear cardiac tests, and stress tests. Our neurology team can perform magnetoencephalography, magnetic resonance angiography, and CT angiography. Our ophthalmology service can perform slit lamp examinations, direct ophthalmoscopy, and retrobulbar anesthesia. Our dentistry team can perform oral examinations, dental radiographs, and dental extractions. Our reproduction service can perform reproductive ultrasonography, sperm analysis, and hormone testing. Our sports medicine service can perform joint injections, soft tissue repair, and bone surgery. Our veterinary oncology service can perform chemotherapy, radiation therapy, and surgical resection. Our veterinary emergency service is staffed by board certified veterinary surgeons and internists 24 hours a day, 7 days a week.

All members of our team have special interests in internal medicine, dermatology, ophthalmology, radiology, cardiology, dentistry, and surgery. Our team is committed to providing the highest quality of care for our patients and their owners. Our goal is to provide compassionate, evidence-based care that is centered around the needs of the patient. Our team is dedicated to ongoing education and research in order to provide the most up-to-date and effective treatment options for our patients. We are proud to be part of the Oklahoma State University College of Veterinary Medicine and to serve the equine community of Oklahoma and the surrounding region.
